Hi,

I'm a highly creative and enthusiastic front-end developer with hands-on skills in a wide range of software and tools.

My experience aligns with multiple website development/maintenance projects at Thomson Reuters. Over the past 3.2 years, as a front-end developer, I have designed, developed, and customized highly responsive and compatible websites maintaining the site speed and following the WCAG (Web Content Accessibility Guidelines) new guidelines. In addition, I have consistently met the client's expectations and project milestones while working within a timeline.

Please consider the following highlights:

- Designed and developed front-end of 100+ webpages for the attorney's website.
- Landing page design
- Maintenance of 200+ sites in browser compatibility, site speed, accessibility, link errors.
- Review and QA of the websites
- Wireframe and Template design for the website

In addition to my experience, I have a solid educational foundation and a passion to contribute my knowledge to the ongoing growth and success of the organization. I have enclosed my resume to provide an overview of my achievements and qualifications for your review.

It would be pleasure to know more about the requirement for the opening position. I would welcome the chance to discuss my examples in greater detail with you. Thank you for your time and consideration. Looking forward to hear from you soon.

Sincerely,

Kajal Kumari Singh
